Professional Summary

Master's student in Artificial Intelligence at Brandenburg University of Technology (BTU), trained in Java Full Stack Web Development. Interned at Rail Wheel Factory, Bangalore, building an employee data management web app with ASP.NET Web API and MS SQL Server. Eager to apply full stack and machine learning skills to build intelligent, real-world software solutions.

Skills

Technical Skills: Python, Java, JavaScript, SQL, HTML, CSS, React.js, Angular, Bootstrap, MySQL ,VS Code, Visual Studio
AI/ML : Machine Learning, Deep Learning, Computer Vision, NLP, LLMs, RAG, Agentic AI, Prompt Engineering

Tools & Frameworks: TensorFlow, Keras, OpenCV, Scikit-learn, Pandas, NumPy, LangChain, Hugging Face Transformers, Spring Boot, React.js, Angular, Bootstrap, ASP.NET Web API

Tools: Git, GitHub, Docker, Kubernetes, Jupyter Notebook .

Work Experience

Graduate Studies Preparation Nov 2024 – Mar 2025

- Undertook intensive preparation for BTU's master's program in Artificial Intelligence, including subject-specific technical coursework, and prepared for IELTS and other academic requirements for successful admission.

Software Developer Trainee, Bangalore, India may 2024 - mar 2025

Pentagon space

• Trained in Java Full Stack Web Development (HTML , CSS , JavaScript , ReactJS , Java , MySQL, Git, Docker , Kubernetes).
• Developed Smart Bank (banking operations), Event Management System (event scheduling and registrations), and Pet Hub App (pet care services) with interactive front-ends and robust Java back-ends using MySQL for efficient data management.

Intern Aug 2023 - Sep 2024

Employee Data Management Web Application Development: Designed and implemented a responsive web application for employee data management during my internship at Rail Wheel Factory (RWF).

- Frontend : Created a user-friendly interface to streamline data entry and management.
- Backend : Used ASP.NET Web API for server-side functionality
- Database : Utilized MS-SQL Server for structured data handling.

CRUD Operations with Dapper ORM: Integrated Dapper ORM to facilitate efficient CRUD operations within the application. This improved data retrieval and storage processes. This experience enhanced my technical skills and provided valuable exposure to a professional software environment. **Rail Wheel Factory, Bangalore, India**

Education

Brandenburg University of Technology (BTU), Cottbus-Senftenberg , Germany April 2024 – Ongoing
M.Sc. in Artificial Intelligence
Relevant Coursework **:** Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, Reinforcement Learning, Data Mining.Visvesvaraya Technological University, Karnataka, India December 2020 - May 2024

B.E in Computer Science (AI) ***GPA: 2.3***
Relevant Coursework: Data Structures and Algorithms, Automata Theory, Engineering Mathematics, Machine Learning, Artificial Intelligence, Computer Networks, Operating Systems, DBMS, Java, Python.

Project Work

Traffic Prediction & Control System (2024) – *Technology: Python*
- Developed a system leveraging computer vision and image processing to analyze live or recorded traffic footage.
- Predicted traffic flow patterns and optimized traffic control strategies for efficient urban management.

Face Mask Detection System (2023–2024) – *Technology: TensorFlow, Keras, Python*
- Built a deep learning model to detect mask-wearing, contributing to public safety.
- Collected and preprocessed data, trained and fine-tuned the model, achieving high accuracy.

Event Management System (2024) – *Technology: Java, Spring Boot, ReactJS, MySQL*
- Built a web-based platform to manage events, registrations, and participants efficiently.
- Developed a responsive front-end and secure back-end with **Java** and **MySQL**

Certification

- Java Full Stack web development – Pentagon space
- Python for Data Science – IBM
- NVIDIA-Certified Associate: Generative AI LLMs (NCA-GENL) – NVIDIA
- Building RAG Agents for LLMs - NVIDIA
